GIKEN INDUSTRIAL CO., LTD.

Dear Customer;

Guidance on discontinuation of GPC driver amp production and
guidance on future GPC repair support

Dear Sir, Thank you for your continued support. We would like to express our sincere gratitude for your continued patronage.

The components mounted on the GPC controller (GPC-4N) and driver amplifier (GPC-D1, D2, D3, D4), which have been ordered for more than 15 years since production, have been discontinued one after another (see the list below). We are unable to respond to the end of production and future repairs.

We would appreciate it if you could consider updating the equipment you are currently using to the alternative "GSK" series. For details, please contact us from "Inquiries" on our website.

	Discontinued parts
GPC controller / GPC-4N	<ul style="list-style-type: none">▪ Crystal oscillator / EXO-3 [Made by Kyocera Kinki]▪ CPU / TMS320C25PL [Made by T.I.]▪ EPROM / MSM27C256 [Made by Oki Electric]▪ IC / PEEL series [[Made by Asahi Kasei]▪ IC / MM1027X-FF [Made by MITSUMI]▪ IC / PST series [Made by MITSUMI]
GPC driver amplifier ▪ GPC-D1, D2, D3, D4	<ul style="list-style-type: none">▪ Current sensor / SY series [Made by LEM]
